REGULATORY & COMPLIANCE ADVISORY

Regulatory requirements are complicated.

Putting them into practice shouldn't be.

Cybersecurity, privacy, and data governance programs increasingly have to account for overlapping laws, regulations, contractual obligations, and industry standards. With 20 years in business, ATOM helps organizations put those requirements into practice.

ATOM BRINGS TOGETHER FOUR DISCIPLINES TO TURN REQUIREMENTS INTO PRACTICE

- **Licensed attorneys**
- **Cybersecurity professionals**
- **Privacy specialists**
- **Technical experts**

Regulatory & Compliance Services

RESEARCH + IMPLEMENTATION

Secure AI Workforce Enablement

ATOM helps organizations implement a wide range of AI tools across their workforce while maintaining cybersecurity and regulatory requirements.

Policy & Governance Development

Development and review of cybersecurity, privacy, data governance, incident response, and related organizational policies and procedures.

Privacy & Data Governance

Support for privacy programs, data governance, data lifecycle management, data protection frameworks, and privacy impact assessments.

Compliance Assessments & Gap Analysis

Evaluation of policies, controls, procedures, and operational practices against applicable regulatory requirements and recognized frameworks.

Regulatory Readiness

Preparation for regulatory examinations, certifications, audits, customer security reviews, and other compliance-driven assessments.

Cybersecurity Regulatory Alignment

Integration of regulatory requirements into cybersecurity programs, controls, risk assessments, and technical implementation.

Virtual Privacy Officer

Ongoing, part-time privacy leadership without a full-time hire: program oversight, policy upkeep, privacy impact assessments, and guidance as your privacy obligations evolve.

Schedule your free consultation.

LAWS, REGULATIONS & FRAMEWORKS *This list is not exhaustive*

COPPA | FERPA | HIPAA | GDPR | CCPA/CPRA | FDA/FD&C Act | Section 524B | FDA 510(k)
SOC 2 | PCI DSS | CMMC | FedRAMP | NIST 800-53 | NIST 800-171 | CIS | ISO 13485

WHEN REGULATION MEETS RISK

Incidents & Emerging Technology

Incident & Breach Regulatory Support

Identification and analysis of potentially applicable regulatory frameworks and reporting requirements during cybersecurity and privacy incidents, with legal determinations referred to the organization's counsel where appropriate.

Emerging Technology & AI

Regulatory and compliance support for artificial intelligence and other rapidly developing technologies, including connected devices, medical-device cybersecurity, and evolving privacy, security, and data-governance requirements.

WHERE CYBERSECURITY, PRIVACY & REGULATION INTERSECT

Specialized Regulatory Experience

Student & Education Data

Privacy and security requirements involving student information, educational technology, schools, and school districts.

Medical Devices & FDA-Regulated Products

Cybersecurity and regulatory support for connected medical devices and other FDA-regulated technologies, from product development through regulatory readiness.

STEM Programs & Student Data

Data protection and privacy for STEM, robotics, enrichment, competition, and other programs that collect information from students, including minors.

Regulated Industries

Cybersecurity, privacy, and compliance support for organizations operating under sector-specific regulatory, contractual, and data-protection requirements.

BEYOND ADVISORY: RELATED ATOM SERVICES

Audit & Gap Assessment
CIS-aligned controls, maturity, and a prioritized roadmap

Penetration Testing
Independent evidence for auditors, customers, and insurers

Virtual CISO
Ongoing security leadership without a full-time hire

Cybersecurity Training
Interactive 90-minute sessions, onsite or virtual

Turn Requirements Into Practice

ATOM helps organizations identify applicable requirements and translate them into practical programs, policies, and controls.
