

Windows Endpoint Hardening for IT Administrators

OUTLINE COMING SOON!

Because every IT environment has unique legacy requirements, compliance mandates, and scaling considerations, effective system hardening requires a phased approach.

We structure this engagement as a multi-step, multi-session workshop tailored to your organization's specific infrastructure. This adaptable format allows us to tailor the depth, pace, and number of sessions directly to your technical landscape.

NH Municipal Cyber Defense Program

The New Hampshire Municipal Cyber Defense Program (MCDP), managed by The ATOM Group, is a key initiative for enhancing New Hampshire's Cybersecurity Defense Services. Funded by the NH Department of Information Technology and the State and Local Cybersecurity Grant Program, it aims to protect public trust in technology by providing comprehensive Cybersecurity training.

The MCDP is critical to New Hampshire as it enhances cybersecurity readiness across municipal and public sector entities. This program stands out because it is customized based on the municipality's type, job description, and organization's existing cybersecurity readiness.
