

Cybersecurity Training for Law Enforcement

Purpose:

This cybersecurity training is tailored specifically for Law Enforcement Personnel in New Hampshire. It aims to enhance their ability to protect and serve New Hampshire communities by better understanding best practices for safeguarding digital assets and sensitive information.

As the Cybersecurity landscape continues to evolve in both sophistication and scope, it is critical to train Law Enforcement personnel to develop specific knowledge and skills to protect themselves and their constituencies against emerging cyber threats. This training will provide essential insights into the latest cybersecurity best practices and threat mitigation strategies, ensuring Law Enforcement Professionals have the knowledge to effectively protect their systems and data while maintaining the security and integrity of their operations.

Audience:

- Law Enforcement Officers
- Law Enforcement Leadership
- Law Enforcement Support Staff
- Dispatchers
- IT Staff Working in Law Enforcement Environments

Outline of the Training:

1. Current Cybersecurity Landscape in New Hampshire

- Overview of recent cyber threats and trends impacting Law Enforcement Personnel in NH
- Analysis of local incidents and presenting a case study
- Understanding the evolving threat landscape and its implications for LEOs

2. Dispatch Computer Cybersecurity

- Best practices for the use of dispatch systems and computers
- Techniques for preventing unauthorized access and cyber attacks

3. MDTs, Radios, Body Cams, and Crime Scene Data

- Secure use in the field

4. Security During Case Investigations

- Protocols for handling digital evidence securely
- Measures to prevent data tampering and unauthorized access
- The dangers of using personal devices for investigations

5. Q&A Session

- Open time for your team to ask any questions or get additional guidance on the topics covered.

NH Municipal Cyber Defense Program

The New Hampshire Municipal Cyber Defense Program (MCDP), managed by The ATOM Group, is a key initiative for enhancing New Hampshire's Cybersecurity Defense Services. Funded by the NH Department of Information Technology and the State and Local Cybersecurity Grant Program, it aims to protect public trust in technology by providing comprehensive Cybersecurity training.

The MCDP is critical to New Hampshire as it enhances cybersecurity readiness across municipal and public sector entities. This program stands out because it is customized based on the municipality's type, job description, and organization's existing cybersecurity readiness.
